

Supporting Successful Transitions for Students with Disabilities

The Learning Support Team at Steinbach Regional Secondary School (SRSS), in partnership with CLDS and HSD, recently hosted a division-wide Parent Night focused on helping families prepare for life after high school. The event brought together families of students, who qualify for community living disability services, to learn about adult services and day programs available throughout Southeastern Manitoba.

Representatives from all five regional day program agencies shared information about their programs and supports, providing parents with an inside look at opportunities available after graduation. A presentation on the Manitoba transition process guided families through key timelines, planning strategies, and available resources to ensure a smooth move into adult services.

Families also had the opportunity to meet one-on-one with agency representatives, ask questions, and make meaningful connections to support their children's future. The evening was both informative and inspiring, empowering families with the knowledge and confidence to plan the next steps in their child's journey.
